

METHOD FOR ENHANCING EPOXY  
ADHESION TO GOLD SURFACES

ABSTRACT OF THE DISCLOSURE

5 A method for bonding one surface to a gold surface comprises the following steps: (a) mixing a solution containing sulfur-containing alkoxy silane; (b) treating the gold surface with the solution; (c) adding sulfur-containing alkoxy silane to an adhesive material; (d) applying the adhesive material with additive on one of both surfaces; and (e) pressing the surfaces against each other while the adhesive material therebetween sets.
